

# X-Deck Competency Test

**Circle letter(s) of all that apply.**

1. What is the certified weight load for the 18" PRO line X-Deck?
  - a. 500 Lb.'s
  - b. 1000 Lb.'s
  - c. 2000 Lb.'s
  
2. How many people can safely be on an 18" PRO line X-Deck?
  - a. One
  - b. Two
  - c. Three
  
3. How many people can safely be on a 28" or 36" wide PRO line X-Deck?
  - a. Three
  - b. Four
  - c. Five
  
4. The X-Deck was built to be as lightweight and portable as possible. Because of this the X-Deck has flex when you walk up the stairs or bounce on top. What are the health/ergonomic benefits from this?
  - a. Safer and lighter for lifting, moving or setting up the X-Deck
  - b. Reduced Stress on your knees and back while using
  - c. Easier to stand on for an extended amount of time
  - d. Allows you to jump from the stand to the floor
  
5. When adjusting the height of your X-Deck you:
  - a. Insert the height adjustable pin into the sliding round sleeve found under the deck
  - b. Put the pin into an empty hole
  
6. When storing or carrying the X-Deck where must you put the height adjustable pin?
  - a. The last hole closest to the end of the deck.
  - b. Any hole
  - c. The height adjustable pin does not need to be stored in the deck.
  
7. When adjusting the height of the X-Deck, where should you place your hands?
  - a. Right hand on the pin – left hand on the "lift here" sticker
  - b. Left hand on the pin – right hand anywhere you wish
  
8. Why is it critical you use the "R" clip to lock in place the height adjustable pin?
  - a. To keep the X-Deck from popping open when carrying
  - b. To ensure that the pin is fully installed and secure while in use.
  - c. To allow you to lower the stand.

**NOTE: The 36" units use two pins and only use the R Clips for storage in the flat locked carrying position.**

9. Never lay X-Deck on floor or table with the deck facing down and pull the locking pin out **unless both legs are being held down.**
  - a. True
  - b. False
  
10. When installing the handrails on your X-Deck when should you do so?
  - a. While standing on the X-Deck at the desired height
  - b. When the X-Deck is folded flat on the ground
  - c. After you have raised the X-Deck to waist height
  
11. The strength rating for the X-Deck handrails are 200 lb.'s side and downward pressure. Can you can use the handrails to stand on, as a ladder?
  - a. Yes
  - b. No
  
12. The X-Deck is considered "Always Assembled Scaffolding" and this assembly is certified by the manufacturer. Must you be Scaffold Certified to use the X-deck?
  - a. Yes
  - b. No
  
13. The X-Deck must be tagged, inspected and verified with a log book - like traditional scaffolding.
  - a. True
  - b. False
  
14. How often does the factory recommend a visual inspection of the X-Deck?
  - a. Before each use
  - b. Monthly
  - c. Yearly
  
15. How often should you replace the rubber feet on your X-Deck?
  - a. As needed when feet are worn
  - b. Annually
  
16. When using the connecting plank between two X-Decks and you are working on something overhead, you are required to have handrails on both sides of your plank.
  - a. True
  - b. False
